Malakwal, Punjab, Pakistan

Key skills

- Scripting
- Networking
- Log Analysis
- Linux
- Vulnerability Scanning
- Incident Response
- Threat Hunting
- NIST Cybersecurity Framework

Certifications

Security+
from CompTIA
Certified 2025

Network+
from CompTIA
Certified 2024

A+
from CompTIA
Certified 2024

Summary

Certified Cybersecurity professional with CompTIA A+, Network+, and Security+ certifications, along with hands-on experience in IT fundamentals and network management. Passionate about penetration testing, ethical hacking, and securing systems against cyber threats.

Career history

Technology and Security Consultant

May 2022 – Present

Supported IT solutions development, secure infrastructure implementation, and cybersecurity strategies.

Key responsibilities

- Played a key role in developing IT solutions and expanding into hardware and cybersecurity domains.
- Assisted in designing and implementing secure network and system infrastructures.
- Provided technical support and guidance for internal IT operations and customer solutions.

Achievements

- Implemented secure network configurations and monitoring tools to protect sensitive data and mitigate potential threats.
- Played a key role in designing and deploying efficient IT and hardware solutions, improving operational performance by 30%.
- Conducted research on emerging cybersecurity threats and recommended solutions, contributing to the development of new security protocols.

Interests

- Penetration Testing
- Red Teaming
- Malware Analysis
